

Sklip Rack System

New!

Sklips are aluminum brackets that allow you to create a shelf or rack system with full and half size sheet pans. These extremely versatile and easy to use braces allow you to quickly create shelves in situations where space is at a premium. Sklip is a durable, compact, and light-weight solution for offsite catering or environments where bun pan racks are not appropriate.

This essential tool can also be used to temporarily modify the interior of ovens and refrigerators in an effort to maximize space. You can stack sheet pans up to 6 high with a recommended load capacity of up to 50 lbs., making Sklip a convenient shelving system for all types of kitchens.

2" high. 24 pieces.

U931-2 \$35.00

4" high. 24 pieces.

U931-4 \$42.00
