STAINLESS STEEL PASTRY RINGS

VALRHONA RINGS

These tart rings are designed and created in partnership with the "Ecole du Grand Chocolat Valrhona". The clever addition of perforations improves this classic and fundamental mold. They promote evenly baked products with uniform browning. The smooth edges and interior finish allow for easy removal of product and tart with a clean even rim. Stainless steel with smooth edges.

SPOON DROP DECORATING SPOONS

Inspired by the tip of a classic fountain pen these spoons add a new dimension to plating. The DecoSpoon is a cleverly designed set of saucing spoons that give you the ability to draw intricate lines, patterns, and they even allow you to write legibly with a variety of sauces. Turn a plate into your canvas and keep your service ware looking fresh and new. You can create wide strokes, thin strokes, overlays, and dots with this innovative set.

Use them like you would any writing instrument. Make sure the sauce is flowing, but with body; similar in viscosity to a crème anglaise. Keep your sauces in a small container making sure the head of the spoon is not fully submerged. This will insure you do not have excess sauce flowing into your design. Fill the tip of the spoon with a small amount of sauce. Hold the spoon upright with the tip touching the plate while you create your desired pattern.

Made in France. Stainless steel.

KLEARCOOK PRO

The French call it "en papillote" and in Italy they call it "al cartoccio". This ancient technique of wrapping food in parchment paper or even leaves has been around for centuries.

KlearCook is the technological revolution of this cooking method using a scientifically designed material that can withstand cooking temperatures up to a maximum 230 °C. (446 °F) KlearCook

sheets can be used in the oven, on the stove-top, on a griddle, in a deep-fryer or even in boiling water or steam. Simply choose your preferred method of cooking using this unique shiny and clear cooking material and open up the endless possibilities of your inner gourmet. Just keep KlearCook sheets away from direct contact with flames.

Historic note: In the late 1800's Antoine Alciatore, the founder of Antoine's restaurant in New Orleans, created a dish called "Pompano Montgolfier" which was made in the "en papillote" style to honour the French Montgolfier brothers who are credited with inventing the hot air balloon.

Antoine's restaurant remains the oldest family run restaurant in the USA today.

SOUS-VIDE LOW-TEMPERATURE COOKING

The term Sous-Vide literally translates into "under vacuum", and has been adopted as the name for a cooking method that relies on precise temperature control. Foods cooked in this method are typically vacuum sealed in a non-reactive plastic pouch and heated in a water bath at a specific temperature until a desired level of doneness has been reached. This exacting technique provides unmatched control and consistency that cannot be found in other cooking methods.
